# International Engineering Competence Centres for green mobility development in Albania and Montenegro **INTEC**

AIM: Advancement in sustainable mobility is addressed in the 2030 Agenda for Sustainable Development. To unite engineers and experts from different disciplines (electronic, mechanical, automotive engineering) is key to drive forward. INTEC tackles the lack of multidisciplinary skills and cooperation among stakeholders in the field of sustainable mobility to generate a positive impact on green regional development in Albania (AL) and Montenegro (MN).

# The Education-Work-EntrepreneurshipChain Model for VET in the Western Balkans BalVET-EWEC

AIM: BalVET-EWEC aims to keep talent home by addressing the need for young people to acquire new skills that will enable them to meet the challenges of a rapidly changing world. Pilots establish living labs as VET capacity-building mechanisms, develop new curricula for skills development for learners ages 16-28, and create opportunities for synergies and cross-border collaboration. Actions VET educators as “paradigm shifter” learning facilitators to mentor learners with skills to respond to myriad jobs - both in conventional local markets and in remote work; entrepreneurship ed positions both VET systems and learners for the twin transitions, and Open Badges display capacity transparency of skills acquired during training.
